

# Miguel Ribeiro

TECHNICAL OPERATIONS | PROCESS AUTOMATION | AI IMPLEMENTATION

Cascais, Portugal | miguel.js.ribeiro@outlook.com | [LinkedIn](#) | [Portfolio](#)

## PROFILE

Cisco technical operations and automation professional who turns operational pain points into practical tools, workflows, and adoption programmes. Developed and scaled a standardized reporting workflow that replaced fragmented manual processes and progressed from Excel and VBA to Python. Also built an AI-assisted knowledge application that makes operational documentation easier to retrieve and use. Hands-on with Python, APIs, MCP, RAG, structured AI orchestration, evaluation, internal tooling and cloud deployment; CCNA-certified and experienced in translating operational requirements into working solutions, documentation and training.

## CORE EXPERTISE

**Automation and AI:** Python, pandas, APIs, LLM integrations, MCP, RAG, tool orchestration, structured state, AI evaluation, Excel, VBA

**Process and implementation:** requirements discovery, process improvement, knowledge capture, rollout, adoption, training

**Applications and cloud:** FastAPI, Django, Flask, React, JavaScript, SQL, Git, Docker, Azure Container Apps, Azure Static Web Apps, Railway

**Networking:** CCNA, TCP/IP, LAN/WAN fundamentals, network security

## EXPERIENCE

**Asset Manager** | Cisco | Oeiras, Portugal

**Jul 2024 - Present**

- Manage enterprise customer hardware and software asset information across entitlement, contract, lifecycle, Installed Base, and renewal processes, working with customer-facing teams, subject-matter experts, and platform owners.
- **Standardized reporting:** replaced fragmented manual deliverables with an automated Software Asset Management workflow; built the initial version in Excel and VBA, then migrated its processing logic to Python for integration into an enterprise platform.
- **Supported adoption:** expanded use across multiple teams through documentation, training, stakeholder alignment, and ongoing improvement.
- **Built an AI-assisted knowledge application:** used Python and SQL to turn a large body of operational documentation into a searchable resource that improves knowledge continuity and access.
- **Recognised with multiple internal awards**, including an All Stars Award for reporting standardisation and automation impact.

## PROJECTS

**SME Process Discovery Agent** | Independent project | [Live](#) | [GitHub](#) **2026 - Present**

- Designed and deployed an evidence-aware AI system that interviews users, investigates operational tools and internal documentation through MCP and RAG, and builds a typed AS-IS process model that preserves provenance, uncertainty, branching, and conflicting evidence.
- Built an application-controlled Analyst-to-Designer-to-Verifier pipeline with live execution telemetry; validated it through 122 deterministic tests and an 11-scenario, 37-criterion behavioural evaluation, then hardened the public demo with session isolation, rate limits, and Docker/Railway deployment.

**LivedHere.pt** | Independent project | [Live](#) | [GitHub](#) **2025 - Present**

- Built and operate a full-stack housing-review platform using FastAPI, React, Azure Container Apps, and Azure SQL, including magic-link authentication, interactive maps, moderation workflows, PII detection, rate limiting, and an AI assistant.

**Engineering Portfolio** | Independent project | [Live](#) | [GitHub](#) **2026 - Present**

- Designed and deployed a Django portfolio application that presents projects as structured technical case studies, using PostgreSQL, Docker-based local development, Git workflows, a responsive interface, and production hosting on Railway.

## CERTIFICATIONS

Cisco Certified Network Associate (CCNA) • Cisco AI Technical Practitioner • Cisco AI Business Practitioner • AI Solutions on Cisco Infrastructure Essentials • Data Science at Cisco Generative AI Blue Belt and Green Belt • Cybersecurity Officer and DPO PRO - AEP

## EDUCATION

**Networks and Cybersecurity Operations** | UPskill, Cisco and Iscte **2024**  
1,036-hour technical programme followed by a 480-hour Cisco internship

**Bachelor's Degree in Food Production** | Escola Superior de Hotelaria e Turismo do Estoril **2016**

## EARLIER CAREER

Ten years in professional kitchens across Portugal, Germany, and Australia, progressing into leadership roles with responsibility for team development, service delivery, operational discipline, and decision-making under pressure.

## LANGUAGES

Portuguese native | English fluent | Spanish conversational | German basic
